PLATFORM EXTENSION

IMPORTANT UPDATE REGARDING PENDING COMMISSIONS

Dear participants

We are about to upgrade the current implementation of the team related smart contracts, which will allow everybody to claim the pending commissions coming from their team partners.

The activation will take place in two stages. We will implement the new contracts on Friday, 23.09. at 10:00 am UTC and will activate them on Tuesday 27.09 at 10:00 UTC

Stage one - implementation:

- 1.** The current Pending Commissions Claiming will be deactivated. From this moment on until Tuesday, you won't be able to claim commissions from the downline. You will receive the commissions, when partners claim their rewards.
- 2.** Three new Contracts will be enabled:
 - Contract 1:** for the partners pending commissions from the vaults.
 - Contract 2:** for the partners pending commissions from the farms.
 - Contract 3:** for the partners pending commissions from the single pool.

Very important!

To be able to activate the team commissions in the new contracts, you will have to interact at least once with one of the vaults, one of the farms and the single pool.

Interaction means, that you will have to claim rewards or deposit a very small amount.

Example 1.

You can claim rewards from one of the vaults, claim from one of the farms and from the single pool. This will be enough to activate the new contracts for your wallet address.

Example 2.

You can make a deposit in one of the vaults, claim rewards from one of the farms and deposit in the single pool.

The contracts need a single interaction to create a record and make your wallet address be eligible to collect the partners pending commissions.

This first interaction might require an additional one-time fee between \$0.5 - \$1.5. This is to record the information in the new contracts.

Stage two - activation:

From when will you be able to claim your partner's pending commissions?

To give the chance to everybody to interact with the new contracts at least once, we will activate the new contracts on Tuesday 27.09. at 10:00 UTC.

From this moment on you will see the pending commissions coming from all partners who activated their wallet addresses (interacted with the smart contracts).

The commissions from all partners, who haven't interacted with the new contracts yet will be distributed when they claim rewards. They won't be included in your new pending commissions.

If there was not interaction between your wallet address and the smart contracts, you won't see the pending rewards and will receive the commissions only when partners claimed their rewards (as it currently is). You're not going to miss any commissions.

4 Old style reward distribution will be available until November 1st. Until then you have to activate the pending commissions in the new contracts.

NOTE: Not activated wallets will lose the commissions after November 1st!

From November 1st on commission distribution on partners claim will be disabled and you will notice reduced gas fees for claims, withdrawals and deposits.
